

Please don't loosen restrictions for cell phone use on commercial aircraft. I am a flight attendant with USAirways. We are very concerned over this issue:

- 1) There is no proof that cellphone signals don't interfere with navigational equipment
- 2) Cell phone use would enable terrorists to coordinate hijacking attempts
- 3) Phones are provided on aircraft for life/death calls
- 4) Added stress in an already stressful environment.

Please let common sense prevail and restrict cellphone use on aircraft to boarding and taxi-in only.
